👤 Profile

Highly motivated and experienced Software Engineer with a passion for creating innovative solutions for complex IT problems. Experienced in Performance Engineering/Testing Doamin and developing Angular applications with an emphasis on scalability, reliability, and usability.

📁 Professional Experience

Tata Consultancy Services, System Engineer 04/2021 – present | Pune, India

Performance Engineer *(May 2021 - Jan 2023)*

- Managed a complex BFSI project for a Credit card application for a major bank in the USA.
- Experienced in conducting load testing, failover testing, and Infrastructure testing.
- Experienced in conducting an in-depth analysis of performance issues, and identifying bottlenecks.
- Involved in fixing the defects by coordinating with the respective infrastructure team, Dev teams, and third-party vendors.
- Proficient in debugging, identifying, adjusting, and rectifying script errors by leveraging Vugen.
- Understanding the application functionality by taking knowledge from scrum teams.
- Collecting the client requirements and analyzing them into functional and non-functional requirements.
- Responsible for taking care of test data requirements for load test executions.
- Created the test plans and test reports for all releases.
- Interfacing with Customers and other stakeholders daily for project status.
- Extensive experience in utilizing monitoring tools such as AppDynamics, Splunk, PCF, and OpenShift Console.
- Spearheaded the migration of Microservices from PCF to Openshift.
- Successfully identified the performance issues in OSE and fixed them, resulting in an improvement of a 25%-30% Response Time.
- Identified and addressed the issues encountered during the Dual Data Center testing.
- **Skills:** *Performance Testing/Engineering, Root Cause Analysis, LoadRunner, Splunk, AppDynamics, Performance Center, Jira, Agile.*

Angular Developer *(Feb 2023 - Present)*

- Experience in developing interactive web applications using Angular, HTML, CSS, and Bootstrap.
- Hands-on experience in developing user-friendly UI using Bootstrap and Material UI.
- Developed the User Login and Registration module, with reactive forms validations.
- Developed the UI for the Add Payment source module for credit card applications.
- Created the Login and Registration API using NodeJS, ExpressJs, and MongoDB and tested with Postman.
- Experienced in mocking the API response using Mockoon.
- Involved in analyzing and resolving the issues in load and lower environments.
- Responsible for creating the reports and maintaining documentation using confluence.
- **Skills:** *Angular 11+, HTML, CSS, Bootstrap, Mockoon, Postman, MongoDB, LocalStorage, Splunk, AWS.*

🧠 Skills

Web Developemnt

Angular, HTML5, CSS3,
JS, BootStrap

Cloud

Amazon Web
Services(AWS)

**Performance
Engineering**

LoadRunner Enterprise,
LoadRunner Analysis,
Vugen

Database

MySQL, MongoDB

Monitoring

AppDynamics, Splunk,
Pivotal cloud
foundry(PCF), OpenShift
Console

Project Management

Jira, Confluence

Programming Language

Java, Typescript

Education

Prof Ram Meghe Institute of Technology and Research, Amravati,
Bachelor of Engineering

08/2016 – 11/2020 | Amravati, India

- **Spelization:** Computer Science & Engineering
- **CGPA:** 8.08

Maharashtra State Board, HSC

03/2015 – 03/2016 | Akot, India

- **Specialization:** Computer Science
- **Percentage:** 71.85%

Certificates

- ISTQB Certified Foundation Level Software Tester
- EDCUBA certified Java Programmer
- AWS Cloud Practitioner Essentials

Projects

Appointment-App-Angular

- Simple Angular Application for Booking the appointment.
- Simple Angular application to demonstrate the basic concept of storing the data in localStorage.
- Users will be able to add, delete, and view the appointments.
- **Technologies:** *HTML, CSS, Bootstrap, TypeScript, Angular CLI, localStorage, Attribute-Directives.*

Angular E-Commerce Application

- Basic Angular E-Commerce application, with mocked APIs.
- The project covers functionalities such as viewing products, cart, and adding cart, searching, and sorting.
- **Technologies:** *HTML, CSS, Angular, TypeScript, Material UI, Mockoon, Observables(rxjs)*

MEAN Stack App

- Mean stack app with a Login and Registration functionality.
- Developed the login and Registration APIs with NodeJS and express library.
- The data will be stored in MongoDB.
- **Technologies:** *HTML, CSS, Bootstrap, Angular, NodeJS, Express, MongoDB,*

Trainings

Angular Developer Intern

01/2022 – 04/2022 | Amravati, India

- Worked on Angular technology and have a good understanding of Developing Single-page Angular web applications and Angular CLI.
- Understanding of the concepts of one-way data binding, two-way data binding, interpolation, fetching data from servers, routing, angular application workflow, components, directives, decorator's modules, services, and angular forms.
- Developed the Single page angular web application called Computer-HUB which is the one-stop solution for all your computer-related queries.

Awards

Rockstar of the Month, Tata Consultancy Services

Jan 2022, Feb 2023
